```
Data Summary
========================================

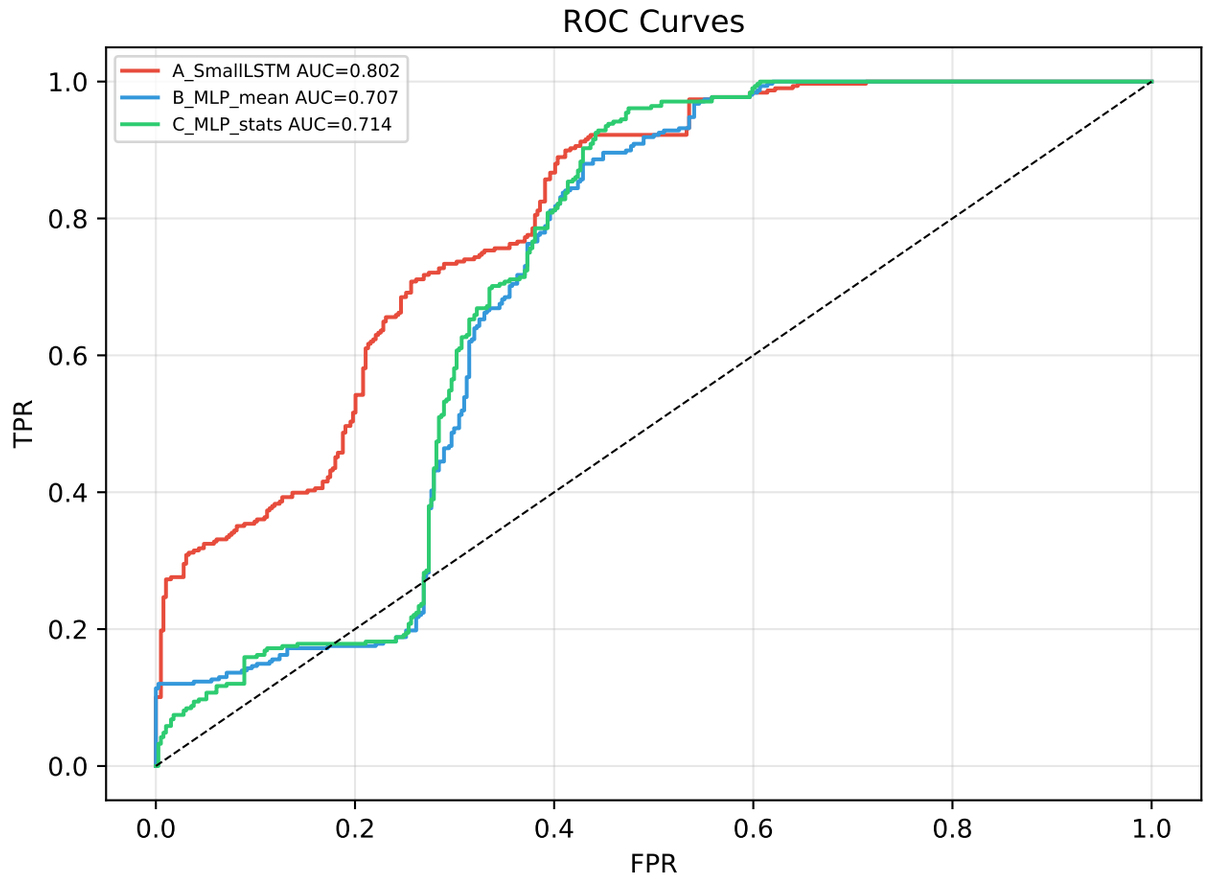

Window: 30 frames, train stride: 15

Split     Seqs    Win   Easy   Hard
-----------------------------------
Train       70   6241   3101   3140
Val         15    725
Test        15    702

Models:
  A_SmallLSTM: 6,338 params, acc=0.670
  B_MLP_mean: 578 params, acc=0.677
  C_MLP_stats: 1,538 params, acc=0.705
```

Page 4: Calibration & Summary

```
SUMMARY
============================================

Model                Acc    AUC   Params  Unc?
--------------------------------------------
A_SmallLSTM        0.670  0.802    6,338   YES
B_MLP_mean         0.677  0.707      578    NO
C_MLP_stats        0.705  0.714    1,538    NO
--------------------------------------------
majority           0.561
fast_thresh        0.771

VERDICT: C_MLP_stats beats majority, close to FAST.
Uncertainty NOT informative.
